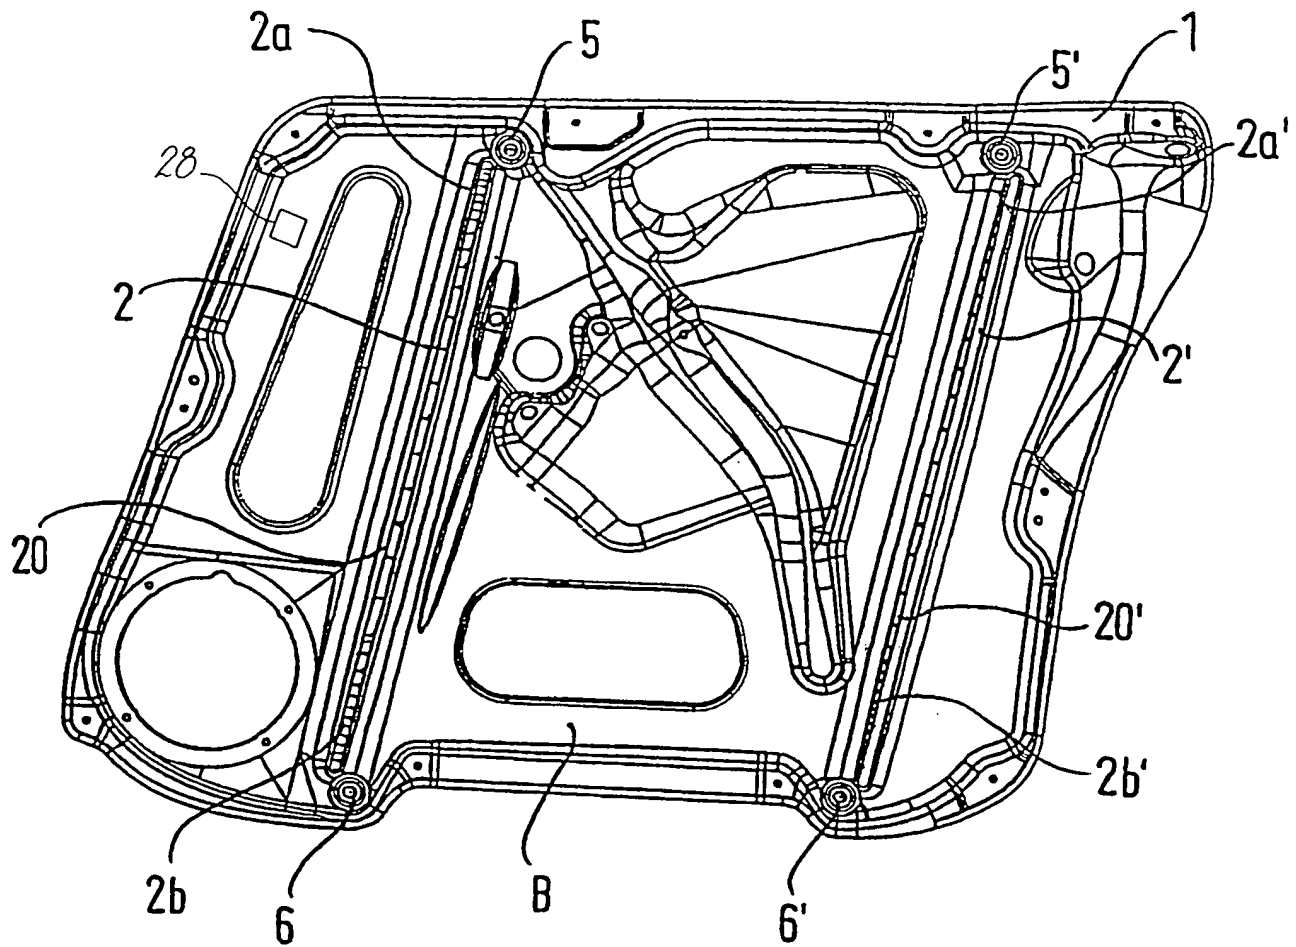

FIG. 12

This diagram shows a cross-section of a second embodiment of the device. It features a central horizontal member (8) passing through two angled support structures (2). The top part of the device has a rectangular frame (3). On the left side, there is a horizontal extension (1^{II}) with a small circular feature (21^{II}). A vertical component (12^{II}) is located at the bottom center, connected to the main body by a small circular joint (123).
